## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21, drawn to a skin barrier replacement composition, classified in class 424, subclass 450.
  - II. Claims 22-39, drawn to a method for recovering or improving a mammalian skin permeability barrier, classified in class 514, subclass 558.
  - III. Claim 40, drawn to a pharmaceutical preparation comprising a therapeutic compound in an aqueous formulation of at least three lipids, classified in class 424, subclass 405.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the composition of Group I can be used in a materially different process such as in rinse-off hair treatment formulations.
3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not capable of use together because the composition of Group I is a

Art Unit: 1616

topical composition comprising lipids while the composition of Group II is a pharmaceutical preparation comprising a therapeutic compound. Further, the inventions have different functions (e.g. invention I is an emollient composition, while invention II is a therapeutic composition) and different effects (e.g. invention I replaces skin barrier, while invention II treats various skin diseases).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I or II, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I or III, restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
